

The following document details the information relating to the various files for BV100 validator -

Download files are made up of a dataset and firmware.

**Dataset** – Contains all the banknote data.

**Firmware** – Controls how the validator behaves.

## NAMING CONVENTION:

**Example:**

                    DATASET                                    FIRMWARE                                    INTERFACE  
**RUB02507\_BV01004162220000\_IF\_01**  
          XXX  YY  Z  ##                                    \*\*\*

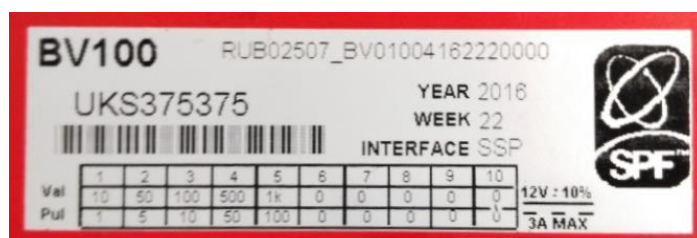

XXX – Currency code

\*\*\* – Firmware version

YY – Dataset Code

Z – Validator Identification

## – Dataset revision

## INTERFACE IDENTIFICATION:

IF\_01:

- SSP
- ccTalk
- MDB
- Parallel
- Pulse
- Binary
- SIO

IF\_02:

- SSP
- NIS
